People caring for people

Age

Specialist assessments are available for patients aged 16 years and above.

Referrals

Please note you will need a valid GP referral requesting a comprehensive assessment when booking an appointment. As part of the referral process, we request that a copy of current medications and any allergies as well as recent pathology results (blood tests) be provided to the treating specialist.

Required results are listed below:

- Full Blood Count
- Electrolytes, Urea and Creatinine
- Liver Function Tests
- Thyroid Function Tests

Prior to the appointment, patients are asked to complete a brief self-assessment which can be downloaded from our website at: www.ramsaymentalhealth.com.au/wentworthville

Following the assessment appointment, the referring General Practitioner will receive written confirmation of the individualised plan and management recommendations.

What to expect?

As part of the specialist assessment, patients will be asked about their background, amount and frequency of alcohol and/or other drug use, details of any previous treatment and general mental and physical health. Answering these questions honestly will assist our specialists to determine your treatment needs. A support person is welcome to attend.

Fees

Specialist assessments are part of the Addiction Health Medical Clinic and are charged in accordance with Australian Medical Association (AMA) recommendations. A substantial Medicare rebate is available (Item 291).
