- Stress and burnout
- Substance abuse and addiction
- Suicidal ideation
- Trauma and PTSD
- Workplace stress

And more

Same day response.
**Appointments
available now.**

Why Ramsay Psychology

Referrals are easy. You can simply address your referrals to Ramsay Psychology Ipswich or if you prefer, to a specific psychologist at the practice. A Medicare rebate is available to individuals who have been referred to Ramsay Psychology with a Mental Health Treatment Plan. We also see clients who are self-funded and those with an accepted claim with an insurer.

We match patients and psychologists carefully. We have a triage service to match your patients with a psychologist whose experience best suits their needs.

Extra support is available. If your patient needs outpatient psychology services outside of our onsite psychology service, we have an extensive team of psychologists available via telehealth to offer support to patients.

Access is flexible. We offer both face-to-face and telehealth appointments with little to no wait time for the convenience of patients.

We work in partnership with you. We keep you in the loop, providing regular patient updates.

Part of Ramsay Health Care

Ramsay Psychology complements the existing inpatient facilities and day programs at Ramsay Health Care facilities to provide comprehensive mental health care for the whole community.
